

TETRA World Congress in Hong Kong

From 26 to 28 May 2008, ATIS participated in this year's TETRA World Congress held in Hong Kong. It was a successful exhibition providing the opportunity to present the company's current solutions in the field of digital communication recording to a new group of customers.

The next TETRA World Congress will be held in Munich, Germany.

DFS Awards Contract for Equipping Major Airports

ATIS was awarded a contract by the German aeronautical service provider DFS (German Air Navigation Service) to install the company's digital voice recording systems at the three remaining international airports which have not yet been equipped. The installation work at the air traffic control towers in Stuttgart, Saarbrücken and Cologne will be completed by the end of 2008.

The units will be equipped with RAID and NAS archiving systems and can record the communication of up to 120 channels of analogue and digital sources each.

IR 44 VoIP

ATIS is pleased to introduce the IR 44 VoIP recording system. This flexible and easy-to-use solution was developed on the basis of the field-proven IR 44. It can record the data of up to four channels originating from active or passive SIP sessions. Mixed configurations with analogue inputs are also possible.

VDS Applications

ATIS has supplied the first VDS (VoIP Decoding System) solutions for recording VoIP based communication. At several emergency response centres in Germany, VDS is used for recording radio communication from the Siemens VAS-B system. Another VDS solution is deployed in combination with the ACEcom IP voice communication system from Thales in Norway.

ATIS at Milipol Qatar

From 17 to 19 November 2008, the 7th Milipol Qatar exhibition, organised by the Qatari Ministry of Interior, will take place at the new Qatar International Exhibition Centre in Doha.

ATIS will be presenting the company's digital recording systems and new solutions for VoIP recording.

You can find ATIS at stand D064.

Sales & Technical Training

During the month of September, a series of technical and commercial training sessions will be conducted at ATIS' headquarters in Bad Homburg. If you have not signed up yet for participation, please contact your KAM or the ATIS Partner Desk.
