

ATIS systems is an independent, privately-owned company of long tradition. We are headquartered in Bad Homburg, near Frankfurt am Main, Germany, and for many years we have been working in the telecommunications sector, specializing in the fields of recording and analysis technology. A key technology partner for network providers, network equipment providers and law enforcement agencies, we are exceedingly well-placed in the market.

For our team we are recruiting a

GUI Designer (m/f/d)

Your main task is to record requirements and create according concepts for the adjustment and extension of existing and new graphical client user interfaces. You will need to describe the functions and create the layouts for the user interface as well as required icons. Close cooperation with the stakeholders, architects and your fellow team members is a natural part of this task. If you have any Java skills, you will be able to create or evaluate prototypes of new UI elements, layouts and frameworks. You will also be able to help develop and maintain the clients.

Your qualifications - extensive know-how and hands-on experience:

- completed degree in computer science or similar technical education in the IT field
- you enjoy designing client user interfaces
- you are creative and passionate about creating concepts
- you must be a devoted team player with an interest in professional development
- skills in the fields of user interface design and ergonomics would be ideal
- skills in the fields of Java, SWT and Eclipse RCP would be ideal

What we offer:

- a safe job in a company of long tradition
- a challenging position that allows for professional development
- a long-term personal perspective with an attractive, performance-based salary
