ATIS systems is an independent, privately-owned company of long tradition. We are headquartered in Bad Homburg, near Frankfurt am Main, Germany, and for many years we have been working in the telecommunications sector, specializing in the fields of recording and analysis technology. A key technology partner for network providers, network equipment providers and law enforcement agencies, we are exceedingly well-placed in the market.

For our team we are recruiting a

System architect (m/f/d)

Your challenging new tasks include:

- Creation of central concepts for system design, taking into account all functional and non-functional requirements,
- presentation of the concepts to our internal stake holders or our clients,
- functional and technical support of our developers during realization of the concepts,
- support working on and answering bids,
- selection and validation of new technologies and further development of our own products.

The concepts include among others:
- architecture concepts for describing technical solutions across components,
- documentation of interfaces, networks and communication,
- installation manuals for installing individual components in the context of project realization,
- further concepts that may be presented directly to the customer.

Your qualifications - extensive and field-tested with regard to your experience:

The following skills are a must-have:
- ☑ Profound skills designing system architectures (>5 years) in the datacenter environment,
- ☑ profound knowledge of network technologies and communication concepts,
- ☑ very good skills virtualizing computing, storage and networks,
- ☑ good skills using Windows and Linux operating systems,
- ☑ an ability to describe and transfer complex issues in a way suitable to the target audience,
- ☑ practical experience running datacenters is a plus,
- ☑ certifications in the Vmware and Software-defined Storage fields are a plus,
- ☑ Experience in the application virtualization field is a plus.

What we offer:

- ☑ interesting assignments in international project teams.
- ☑ a safe job in a company of long tradition.
- ☑ a challenging position that allows for professional development.
- ☑ a long-term personal perspective with an attractive, performance-based salary.
