

ATIS systems is an independent, privately owned company of long tradition. We are headquartered in Bad Homburg, near Frankfurt am Main, Germany, and for many years we have been working in the telecommunications sector, specialising in the fields of recording and analysis technology. A key technology partner for network providers, network equipment providers and law enforcement agencies, we are well-placed in the market.

For our team we are recruiting

Junior/Senior GUI Developer Java (all genders)

Your main task is the development and maintenance of components in graphical user interfaces that are implemented on the basis of Java and the "Eclipse Rich Client" framework (RCP). Additionally, you take part in the design process and actively supervise the development of the client.

In particular, this includes:

- Implementation of functional components
- Failure analysis, optimization and further development of existing functional components
- Assessment of requirements and creation of functional specifications (functional concepts)
- Involvement in architecture reviews

Working in close coordination with your team leader and your fellow team members.

Your qualifications - extensive know-how and hands-on experience:

- A completed university degree in computer science or a similar technical qualification in the IT field.
- Experience in developing Java-based applications in the field of graphical user interfaces, ideally using Eclipse RCP.
- Knowledge in interface design and application ergonomics is a plus
- Knowledge in the field of SWT is a plus
- You are a team player, you are committed and interested in improving yourself

What we offer:

- Interesting assignments in international project teams.
- A safe job in a company of long tradition.
- A challenging position that allows for professional development.
- A long-term personal perspective with an attractive, performance-based salary.
