

ATIS systems is an independent, privately owned company of long tradition. We are headquartered in Bad Homburg, near Frankfurt am Main, Germany, and for many years we have been working in the telecommunications sector, specialising in the fields of recording and analysis technology. A key technology partner for network providers, network equipment providers and law enforcement agencies, we are well-placed in the market.

For our team we are recruiting a

System Developer Telecommunications (all genders)

Your main task is the realization of software modules for interfaces with network providers.

In particular, this includes:

- Implementation of functional components
- Realization and module tests
- Creation of technical specifications as a basis for implementation (data processing concepts)

You work in close coordination with your team leader and colleagues from all teams.

Your qualifications - extensive know-how and hands-on experience:

- Experience in programming Java, ideally experience in implementing interfaces between system components within a system or across systems
- Basic programming experience in C/C++ as a basis for the transfer of functionalities to Java components is a plus
- Familiar with relevant design methods and their respective documentation procedures
- Knowledge of relational databases, preferably Oracle or PostgreSQL, is optional
- Basic programming experience in TCP/IP and UDP is a plus
- Willingness to learn about TK-specific standards, e.g. VOIP (SIP, RTP) and ETSI
- You are a team player, you are committed and interested in improving yourself,
- You enjoy new challenges and like working with existing systems.

What we offer:

- Interesting assignments in international project teams.
- A safe job in a company of long tradition.
- A challenging position that allows for professional development.
- A long-term personal perspective with an attractive, performance-based salary.

Look ahead with us and apply via:
